

Sizing Chart for Breast Forms and Symmetry Shapers

- Find your customer's bra cup size in the chart to the right. See the reverse side for a guide on how to measure for the correct bra size.
- Follow the row horizontally, to find her bra band size.
- Follow this column vertically down to the breast form or symmetry shaper style; the number in this square gives you the product size to try.
- This chart is only a guide. For a perfect fit, size up or down as needed.

Women's breasts not only differ in cup size and band size, but also in cup forms. In order to achieve the closest fit, Amoena offers three different cup forms. These are designated with the numbers 1-3 (corresponding to shallow, average and full cup forms) in the breast form name. For example Amoena Contact 2S is an average form.

Once the correct breast form size is determined, continue by selecting the cup form. Then, compare the pictures in the corresponding row on the left with the profile of the woman's remaining breast while she is wearing a bra and select the best match.

TIP: Women with a small underbust tend towards full cup forms, women with a large underbust tend towards shallow cup forms.
